

County Youth Work, Learn, & Earn A Green Future

The Orange Country Green Jobs Corps (OCGJC) is helping youth and young adults develop job skills for a variety of green careers in eco-friendly industries. OCGJC members "learn and earn" in the green jobs industry while they continue their education and contribute as volunteers to the greening of their communities.

As part of the OCGJC program, Corps members participate in exciting training projects such as Young Inventors Green Manufactur-

ing Program, Green Printing/Flexography, Zero Waste Management, Solar and Green Construction. OCGJC members tour green businesses, engage in classroom training and participate in hands-on green jobs work experience. Corps members partake in pre-employment, work maturity and life skills training, and customized educational programs on civic responsibility and environmental stewardship.

The OCGJC has gained the support of divergent

green businesses and training providers, including Southern California Edison, Toshiba America, Earth Resource Foundation, Vital Link, Orange County Sanitation District, Taller San Jose, Orange County Conservation Corps and many other local businesses and organizations.

We are still accepting applications for Corps members – but spots are limited!

If you are a youth or young adult enthusiastic about pursuing a green career, between the ages of 16

and 24, and willing to commit to green job training; please contact the Orange County Green Jobs Corps Program at 714-567-7528 or visit our website at www.ocgreenjobs.org for eligibility information.

If you are a green business or organization and would like to support the program by providing tours or work experience opportunities, contact the OCGJ Corps Program at 714-567-7528. ■
